NEXTGEN
GENERIC PROCEDURE TEMPLATE
NEXPLANON INSERTION/REMOVAL
DEMONSTRATION

This demonstration reviews how to use the Generic Procedure Template. In this example we'll document insertion & removal of Nexplanon, & show how to save that as a preset for future use.

This has been prepared for EHR 5.8 & KBM 8.3. You may see minor cosmetic differences from some of the graphics used here, & subsequent updates may display cosmetic & functional changes.

Use the keyboard or mouse to pause, review, & resume as necessary.

Notes

- There is not a dedicated template in NextGen to deal with Nexplanon insertion or removal, so we need to use the Generic Procedure template.
- While you can search for the necessary diagnosis & procedure codes, it will helpful to know these codes ahead of time, perhaps by keeping them on a "cheatsheet" in the office:
  - Insertion: Diagnosis code V25.5, Procedure code 11981, Device J7307.
  - Removal: Diagnosis code V25.43, Procedure code 11982.
  - Removal with Reinsertion: Diagnosis code V45.52, Procedure code 11983, Device J7307.

As with most procedure templates, you can use the checkboxes to indicate appropriate preoperative discussions took place.

You can also click Consent to generate a full consent form, though it many cases it will be simpler for clinics to use the paper consent forms they already have, scanning them into NextGen after completion.

Consent - Procedures

Provider:

Consent by:

Type of procedure:

Procedure date: / / ☐ To be scheduled in the near future

☐ Procedure, treatment alternatives, risks and benefits were explained. specific risks discussed

This is what the generic consent template looks like. It is a useful tool if you don't already have a consent form tailored to the procedure you're performing.

The Indication Description & Code boxes are where you document the diagnosis for the procedure. As mentioned earlier, it's easiest if you know the code going in. Click in the Indication Description box, bringing up the **Search** popup.

When the popup appears, type V25.5, then click Search.

Submit to Superbill

Save & Close   Cancel

A number of phrasings for this code appear. Double-click on whichever you prefer.

Another thing to remember about the Generic Procedure Template: Unlike the dedicated procedure templates, which often submit the charge for both the procedure & medication/device, the Generic Procedure Template only posts the procedure charge to the superbill.

To post the charge for the Nexplanon device, click Office Diagnostics at the bottom of the **SOAP** Tab.
