### NEXTGEN LAB ORDER AND RESULT DEMONSTRATION

This demonstration reviews ways in which you can order lab tests, then view and respond to the results. Details of the workflow will likely vary somewhat, depending on specialty and clinic policy, though this should give you a good idea of NextGen functionality.

This has been prepared for EHR 5.7 & KBM 8.3, though a few screen shots from earlier versions may be used when they don't affect the clarity of the presentation. Subsequent updates may display cosmetic & functional changes.

Use the keyboard or mouse to pause, review, & resume as necessary.

# Ordering Outside Lab Tests

• There are a few different ways to place outside lab orders in NextGen. There are advantages & disadvantages to the various methods, & some have had technical limitations preventing us from using them.

• In this demonstration we'll illustrate the "Order Module" method of lab ordering, which is our recommended method until we learn more about KBM 8.3.

Notes about sending vs printing lab orders: Clinics with a LabCorp service center in the building বাব (currently Pediatrics & Family Medicine) theoretically could get by without printing orders, but we've had issues with the electronically-transmitted orders not reaching LabCorp before the patient does. So it is best to also print or fax an order in addition to transmitting it electronically when you're sending patients directly to the lab from the clinic. If you're ordering something that is going to be done on another day, or even just an hour later, you're usually OK with just the electronic transmission. For clinics who just have a LabCorp phlebotomist on site, you'll always want to print or fax the order—but we still ask you to include the Save & Send step to help results get back to the chart efficiently.

## Reviewing Lab Results

- You will be notified about test results through your **Task List** or **PAQ**.
- After reviewing results, you'll use the **Telephone template** to address them.
- You review test results through the Order Module, regardless how you placed the order.

## Printing Lab Results

Sometimes you just need a copy of the lab results on paper. You've got a few options for that.
