

NEXTGEN PRENATAL FOLLOW-UP VISIT DEMONSTRATION

This demonstration reviews a typical follow-up prenatal visit; we'll also cover documenting lab & ultrasound findings. Details of the workflow will likely vary somewhat, depending on practice policy & clinic layout, though this should give you a good idea of the prenatal functionality within NextGen.

This has been prepared for EHR 5.8 & KBM 8.3, though some screen shots of older versions may appear if they don't compromise the presentation. Subsequent updates may display cosmetic & functional changes.

Use the keyboard or mouse to pause & resume as necessary.

Compose Remove + To Do + To Chart Chart

The nurse begins by double-clicking on the patient from her provider's appointment list.

Our patient is in for a follow-up prenatal exam. We'll also take this opportunity to demonstrate documentation of an ultrasound. There are several options on the order you do things & what parts are done by the nursing staff vs. providers, but this will provide you one example of a reasonable workflow.

Always begin by performing the 4-Point check.

The screenshot displays the NextGen EHR interface for a patient named Didre Quagmire (F), DOB: 04/01/1990 (24 years), MRN: 000900044722. The patient is currently in the 'Intake' tab, which is highlighted with a green oval. The 'Specialty' and 'Visit Type' fields are in red, indicating they are required or missing. The interface includes a navigation pane on the left, a main content area with various tabs and sections, and a patient history pane on the right. The patient history pane shows a list of visits, with the most recent one on 06/25/2014 at 09:55 AM.

When you first open the chart to the Intake Tab, you'll note all the tabs are blank, & Specialty & Visit type are in red, demanding attention.

Click in the **Specialty** box & pick **Obstetrics**.

Note to Family Medicine Users:
You can now select **Family Practice** here as well; this will introduce a few small workflow variations that will be pointed out.

On the **Visit types** picklist select **OB Prenatal**.

NGTest USA Health Services Foundation rlduffy CAP NUM SCRL 06/25/2014

It's always good to begin by noting whether there are any **Sticky Note** or **Alerts** entries. Alerts is activated, displaying in **red**. If you review it, you'll see that pregnancy is the reason for the alert.

The screenshot shows a medical software interface for a patient named Diddy Quagmire (F). The patient's information includes DOB: 04/01/1990 (24 years), Weight: 146.00 lb (66.22 Kg), Allergies: (1), Problems: (1), Diagnoses: (2), and Medications: (1). The address is 666 Scenic Hwy, MOBILE, AL 36604. The MRN is 000900044722. The insurance is AFLAC. The emergency relation is not specified. The emergency phone and pharmacy 1 are also not specified. The PCP is DUFFY, ROBERT LAMAR MD. The referring and rendering providers are also DUFFY, ROBERT LAMAR MD. The interface includes a navigation bar with options like Alerts, GYN Details, Patient, Lipid Clinic Data, Order Admin, Sticky Note, Referring Provider, HIPAA, Advance Directives, and Screening Summary. The main content area shows a visit type of OB Prenatal and a specialty of Family Practice. The visit date is 06/25/2014 09:55 AM. The visit title is **USA Intake 836**. The main content area has tabs for Intake, Gestational Age, Histories, Education, Prenatal Detail, SOAP, and Checkout. The Intake tab is selected. The main content area also has a care guidelines section and a global days section. The patient history panel on the right shows a list of visits with dates and times.

There is a potential patient safety ramification here.

It makes sense for "pregnancy" to show as an alert, especially if a non-obstetrical provider is seeing the patient. But it means the obstetrician is going to see this alert lit up every time, which could lead you start to ignore it. It behooves you to check the alert to make sure there isn't something else there you need to know about.

Click Lab Results-Last 30 Days.

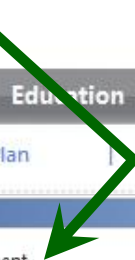

A document with her results is generated—and note that you see this document on the History Bar. Print this.

The screenshot displays a medical software interface. At the top, a patient's information is shown: Didre Quagmire (F), DOB: 04/01/1990 (24 years), Weight: 150.00 lb (68.04 Kg), Allergies: (1), Problems: (1), Diagnoses: (3), Medications: (1). The address is 666 Scenic Hwy, MOBILE, AL 36604. The MRN is 000900044722. The insurance is AFLAC. The PCP is DUFFY, ROBERT LAMAR MD. The referring and rendering providers are also DUFFY, ROBERT LAMAR MD. The history bar shows three tabs: "USA Prenatal Detail 836", "USA Document Library", and "Document 'LabResults'". The "LabResults" tab is active, showing a "Lab Result Report" for "CBC/D/Plt+RPR+Rh+ABO+Rub Ab..." dated 06/23/2014 10:24. The report includes a table with columns for Description, Result, Flags, and Range. The Patient History panel on the right shows a list of documents, including "LabResults".

Description	Result	Flags	Range
ABO Grouping	A		
Antibody Screen	Negative		Negative
Antimicrobial Susceptibility			
Baso (Absolute)	0.0		0.0-0.2
Basos	0		0-3
Eos	3		0-5
Eos (Absolute)	0.2		0.0-0.4
Hematocrit	42.6		34.0-46.6
Hematology Comments:			
Hemoglobin	14.5		11.1-15.9
HIV 1/O/2 Abs, Qual	Non Reactive		Non Reactive
HIV 1/O/2 Abs-Index Value	<1.00		<1.00
Immature Cells			
Immature Grans (Abs)	0.1		0.0-0.1
Immature Granulocytes	1		0-2
Lymphs	28		14-46
Lymphs (Absolute)	1.7		0.7-3.1

Now go back to the Prenatal Detail tab.

Click Update Lab Results again, & enter results.

Specialty ▾ Obstetrics

Visit Type ▾ OB Prenatal

As an aside, there does seem to be evidence that NextGen is working on getting lab results back to the prenatal templates, so maybe there will be an end to this manual entry nonsense at some point.

Care Guidelines

G: P: T: P:

Risk Level: low

General

Pre - pregnancy wt (lb): Date:

Total pregnancy weight gain (lb):

Planned feeding: breast bottle both

EGA Calculator (for future estimating)

As of: EGA will be:

EGA of: will fall on:

No Yes Patient agrees to transfusion
 No Yes Antepartum anesthesia consult planned
 No Yes Prenatal classes taken
 No Yes Patient desires sterilization
 Cats in home
 No Yes Latex Allergy?

Now let's work our way down the rest of the template.

Prenatal Visits

Patient note:
